

Kristin is the instructional specialist for Health, PE, and Family Life Education for Alexandria City Public Schools, where she aims to bring equity to all students through instructional fidelity. She recently moved into this role after spending the last eighteen years in the classroom. Kristin holds a Masters in Physical Education, a BS degree in Health and Physical Education, and is a National Board Certified Teacher. During her career she has piloted and designed the Bikes in the Schools (BITS) curriculum geared for elementary students and taught Advanced Biking Skills (ABS) at the middle school level. Kristin most recently devised a pedestrian education (PedEd) program to be implemented to all second graders in ACPS. She piloted it at one elementary school in the 2018-2019 school year and created a virtual option that was taught in 2019-2020 and 2020-2021 due to distance learning. Kristin not only brings curriculum knowledge, hands-on experience, but a shared deep belief in the importance of educating youth on biking and pedestrian safety. She believes not only will it inform and improve safety, but it will also encourage walking and biking, and open doors to accessibility within their community.

Kristin Donley, M.Ed., NBCT

ACPS Health/Physical Education/Family Life Education K-12 Instructional Specialist
